

Test Question Sheet for EVA

Use this list to manually verify EVA's responses. Try each line exactly as written, then try it again with different punctuation/casing (e.g. `Hi!`, `HI??`, `hi.`) to confirm punctuation no longer breaks matching.

- who built you

5. About this project

7. Honest limitations (should say "under construction", not pretend)

- are you sentient
- are you conscious
- can you learn
- will you remember me

8. Fallback (things EVA should NOT know — confirms honest "I don't know")

- what's the capital of France
- can you write my assignment
- do you have a friend
- what's 2 plus 2
- asdkjhaskjdh (gibberish)

9. Punctuation stress test

Repeat a few lines above with heavy punctuation to confirm matching still works:

- Hi!!!
- HELLO???
- who made you??
- what is ai!!!
- I'm fine.
- read a PDF, please.

Expected behavior overall:

- Punctuation ('!', '?', '.', ',', multiple marks) should never cause a fallback "I don't understand" response for questions listed above.
- Tone should read as professional with only occasional light wit (the joke, the "favorite color," and the "are you sentient" lines are the main sarcastic/witty ones, most other replies are plain and direct).
